

# ACTIVE DIRECTORY AUTHENTICATION

- It is no longer necessary to set up users separately on each individual printing system
- Central rights assignment and management
- Users can log on directly to the printer with their Windows credentials
- Password policies are managed via the Windows domain
- Employees do not have to remember different passwords
- Authentication service can be installed on any Windows PC / server or in a virtual machine
- Available for: Domino D-Series, F-Series, G- / Gx-Series, Vx-Series, Cx-Series
- Audit log export function
